Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

- The primary reasons for allowance for claims 1-2, 4-6, 12-14 are the inclusion of a liquid drop ejecting device comprising a plurality of control sections which are provided with circuits for restricting an oscillation of a driving waveform applied to the ejecting heads and a selecting section provided with a plurality of mechanical switches for switching an electric connection condition between a control section and the ejecting heads, wherein the ejecting heads have different specifications from each other. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.
- The primary reasons for allowance for claims 7-8 and 11 are the inclusion of a liquid drop ejecting device comprising a plurality of ejecting heads having different specifications from each other and a plurality of control sections which are disposed on each head unit, wherein the control sections have a circuit for restricting an oscillation of a driving waveform, wherein the circuit is selected according to an electric characteristics in the liquid ejecting head. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.

Art Unit: 2861

- The primary reasons for allowance for claims 9, 15-17 are the inclusion of a liquid drop ejecting method comprising the steps of selecting a control section among a plurality of control sections which have circuits for restricting an oscillation of driving waveform and supplying a driving signal to the selected ejecting head via the control section which is selected in the step of selecting the control section. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.
- The primary reasons for allowance for claim 10 are the inclusion of a method for ejecting a liquid drop comprising the steps of mounting a head unit provided with an ejecting head and a control section for restricting an oscillation of a waveform applied to the ejecting head according to an electric condition of the ejecting head and supplying a driving signal to the head via the control section disposed in the head unit. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
